

# See every drop

## Tank Level Monitor

JAN 2026

Never run dry,  
never overflow,  
never guess again.

Get clear visibility of your water, diesel, or liquid fertilizer levels without second-guessing.

Check tank levels anytime from your phone and stay ahead of issues before they become emergencies or costly surprises.

# Monitors your water levels, so you don't have to.

Your tanks are monitored around the clock, freeing you from constant manual checks.

With custom alarms and notifications, you'll only be notified when something needs attention, giving you peace of mind and more time to focus on the jobs that matter most.

## No more water runs.

Eliminate unnecessary trips just to check the tanks.

With level information always at your fingertips, you can cut down on time and fuel costs, while keeping livestock supplied constantly with water.

# Install. Connect. Done. Water monitoring made easy.

Designed for straightforward DIY installation on almost any tank, dam, or trough, the system works wherever your operation takes you.

Once it's set up, you can trust that your water is being monitored reliably. It works anywhere on your property thanks to both cellular and satellite connectivity.

# Benefits

Connect from anywhere.  
Works on Cellular and  
Satellite networks.

Easy and simple  
to install.

Customize alarms and  
notifications your  
way.

## Your tank levels on your phone

Check tank levels anytime, anywhere. Whether you're on farm, at home, in the office, or on the go, simply bring up the app on your phone and you'll know how much water you have straightaway.

## Quick and easy installation

Be up and running in minutes with straightforward DIY installation: mount the bot on your tank, connect the cable sensor, and download the app. It's that easy.

## No blind spot with dual connectivity

It works everywhere with dual satellite and cellular connections so you can get reliable monitoring from anywhere on your property, whether that's on or off the grid.

## See every tank in one view

Know exactly how much water you have and where, without driving from site to site. See every tank and know what's full, low, or needs attention, all in one view.

## Designed and built for the elements

Purpose-built for the most demanding farming and ranching environments, it is waterproof and fully encapsulated and sealed. It's built to perform reliably, rain, frost, or shine.

## Alarms and notifications your way

Whether you need a quick daily check-in or near-instant alerts the moment something changes, you can customize the notification settings to match the way you work.

## More than just a water level monitor

Install not just on tanks but also on dams or troughs. Plus, go beyond water monitoring and start tracking diesel and liquid feed levels, too.

The Tank Level Monitor  
is built with our  
customers in mind.

#### For the livestock farmers and ranchers

Keep water flowing and herds healthy with reliable tank visibility for 24 hours a day, 7 days a week, 365 days a year. Install in water points anywhere on your property, whether on or off the grid. The Tank Level Monitor helps you stay ahead of shortages, detect issues early, and manage remote water points without the long and costly manual checks.

#### For the produce growers

Protect your crops and irrigation schedules with real-time insight into every tank and trough. Whether it's water, nutrient mixes, spray tanks, or irrigation supply, the Tank Level Monitor delivers accurate readings that help you plan every drop.

#### For the lifestyle farmers, hobby farmers, or lifestyle block owners

Simplify water management on your property with smart monitoring you can trust. See all your tanks in one view, get alerts before levels run low, and enjoy peace of mind knowing your supply is under control. It works, even when you're away.

#### For commodities suppliers

Monitor storage and distribution with precision. From diesel and liquid feed to wash-down chemicals, the Tank Level Monitor helps you track inventory across sites, schedule refills efficiently, and keep operations moving without interruption.

# Alarms and notifications your way

Whether you need a quick daily check-in or near-instant alerts the moment something changes, you can customize the notification settings to match the way you work

## Everything you need in one simple plan: Subscription to Cellular and Satellite Service

The Tank Level Monitor uses both satellite and cellular network connectivity, automatically choosing the best network based on its location. Your connection type determines the frequency and timing of alarms and notifications.

We've made it simple. There's only one subscription plan that covers connectivity for both networks. However, please note each device needs an active subscription plan to operate.

	Network Connection	
	Cellular	Satellite
<b>Alarm timing</b> How quickly you'll be alerted if a tank goes over or under your set thresholds.	Within 15 minutes	Within 15 minutes
<b>Level reads</b> The number of times the sensor sends level data updates to your mobile phone	Every 3 hours, with the ability to customise sending times	Every 12 hours, with the ability to customise sending times
<b>Historical data</b> For tracking historical water usage and trends	2 years	2 years
<b>Subscription inclusion</b> Your subscription plan provides you with a limit on the number of alarms per device per month.	Unlimited  N/A	30  Additional alarms are charged on a per-event basis. Please contact your Gallagher representative or visit the website for more information.

*The Tank Level Monitor and the accompanying app is manufactured and developed by Agbot and is distributed worldwide by Gallagher Animal Management. The information in this document is correct at the time of publication. ## What's in the box

x1 Bot with Protective Cover	x1 Cable Management Mounting Base
x1 2" BSP Plastic Nut	x1 Rubber Positioning Mat
x1 3m Hydrostatic Pressure Sensor	x4 Tek Screws
x1 Pressure Sensor Cable Cover	x2 M5 Screws

## Technical Specifications

Connectivity	Cellular and Satellite
Certifications	AUS/NZ RCM FCC ID: XMR024BG770ASN IC: 10224A-024BG770ASN
Installation	Tek screws direct to tank or 2" BSP coupling
Physical construction	Waterproof, fully encapsulated, environmentally sealed
Sensor	Hydrostatic pressure sensor
Accuracy	+/- 0.5% fs
Operating temperature	-40 degrees Celsius to +80 degrees Celsius -40 degrees Fahrenheit to +176 degrees Fahrenheit
Battery	Primary lithium battery, up to 7-year battery life expectancy subject to transmission frequency and deployment conditions
Manufacturer warranty	2-year manufacturer's warranty

## Shipping Dimensions - Single Box

Type	Qty	Dimensions	Weight (kg) Incl plt 15kg	Note
Single Box	1	296 x 140 x 125	1.5
